

	QUALITY, ENVIRONMENTAL AND OCCUPATIONAL RISK PREVENTION POLICY	Rev No.: 12 Date: 23/10/17 Page: 1 of 1
---	---	---

APLI PAPER S.A.U. is a company dedicated to designing, manufacturing and commercializing labels and other self-adhesive products, as well as office, educational and school products. The main objective of the Company is to obtain the satisfaction and confidence of our Clients, which will assure the continuity of the Company.

Safety, Quality and respect for the Environment in the manufacturing processes of our products and services are how we intend to achieve our main objective, as well as to obtain prestige within our sector and in the business world in general. Therefore, we comply with the requirements of an Integrated Quality and Environmental Management System Sistema, based on UNE-EN-ISO 9001 and UNE-EN-ISO 14001 standards, whose objectives are measured to improve the efficacy of the System continuously.

Our basic principles are the following:

- Rational use of natural resources, complying with the requirements established for FSC and PEFC Chain of custody certification regarding our main raw materials.
- To know the needs and expectations of our Clients at all times, to obtain their maximum satisfaction.
- To comply with legislation and regulations regarding protection and preservation of the Environment and Prevention of Occupational Hazards, as well as any other requirements.
- To establish methods for continuous improvement, adequate use of resources, minimization of waste, prevention of pollution and protection of the health and safety of our personnel.
- To establish objectives aligned with strategic management, taking into account the context and the interested parties.
- To promote a focus on processes and a risk-based approach, to draw up a preventive system that will enable us to detect new opportunities.
- Continuous improvement of cost efficiency as the basis for the internationalisation of our activities, without compromising the safety and health of personnel.
- Continuous innovation and adaptation to new technologies and information systems when their implementation is financially viable.
- To maintain and improve the Integrated Management System, to continue evolving, being competitive and leading our Market.

The preventive activity of the company, which is integrated into the organizational structure of the company, is focused on:

- Avoiding hazards and evaluating those that cannot be avoided, combating risks at origin.
- Adapting the work to the person, particularly regarding the design of the work posts, as well as the choice of equipment and work and production methods, especially striving to attenuate monotonous and repetitive work and to reduce its effects on health.
- Taking into account the evolution of technology and replacing what could pose as a danger with other elements that pose little or none.
- Planning prevention, striving for a coherent whole that integrates technology, organization and work conditions, social relations and the influence of environmental factors on work.
- Adopting measures that give priority to collective prevention in preference to individual.

The principal resource of APLI PAPER S.A.U. is its Personnel. For this reason, their awareness, motivation and active participation are essential to achieve our goals. For this purpose, the Company will provide its personnel with the information and training necessary, in a continuous manner, for them to carry out their work adequately within the quality standards of our products, protecting the Environment and preventing occupational hazards.
